PROFILE

I love crafting intuitive, high-performing front-end experiences, but at the core, I'm driven by delivering real value to customers. As a Senior Software Engineer, I focus on building scalable, user-friendly enterprise applications that solve real-world problems and make a tangible difference.

Expertise in establishing UI standards and optimizing infrastructure, ensuring scalable and maintainable platforms that deliver consistent and engaging user experiences. A strong advocate for accessibility, committed to improving usability through compliance with WCAG and Section 508 standards.

EMPLOYMENT HISTORY

Senior Software Engineer at Alation, Ahmedabad
July 2021 — Present

- Established and enforced **UI standards & best practices** to build a **scalable, maintainable platform**, ensuring **consistent UX across features**.
- Optimized front-end infrastructure for **speed, stability, and delivery**, leveraging **TypeScript, Nx Monorepo, React, Material UI, and Vite**.
- Ensured **WCAG & Section 508 compliance**, improving **accessibility and usability**, leading to a **better user experience**.
- Implemented **internationalization (i18n) & localization (l10n)**, expanding platform reach to **multiple markets**.
- Led the adoption of **end-to-end testing with Playwright**, increasing **test reliability and coverage**, enhancing product quality and trust.

Senior Software Engineer at Infor, Ahmedabad
August 2018 — July 2021

- Developed and maintained **Birst**, a **BI & data analytics platform**, focusing on **dash-boarding and data visualization** using **Angular & AngularJS**.
- Built and optimized an **in-house data visualization engine** capable of handling **100,000+ data points**, improving performance and scalability.
- Developed and maintained **Selenium & Jasmine automation suites** with **1,000+ test cases**, ensuring product stability and reducing regression bugs by **30%**.

Software Engineer at Streebo, Ahmedabad
January 2014 — July 2018

- Led a team of developers to design and implement scalable enterprise applications using **Angular, Ionic, and IBM MobileFirst**.
- Worked directly with clients across **Chile, Singapore, UAE, the U.S., and the Philippines**, traveling onsite for **requirement gathering, production releases, and knowledge transfer**.
- Set up and optimized **IBM MobileFirst 8.0 infrastructure**, including **clustering, load balancing, and integration with backend systems** for major enterprises like **Etihad Airways and Dubai Health Authority**.

EDUCATION

Master of Computer Applications (MCA), Computer Science, Gujarat University
